Presentation Overview

More and more tunneling contractors around the world are adopting newer communications technologies to improve safety and productivity during the construction and operating phases of their tunneling projects. NLT provides rugged, plug and play digital networks enabling communications, tracking, alarming, and environmental monitoring for such projects around the world. Recent installs include the Brenner Base Tunnel in Austria, Crosslinx in Toronto, Forrestfield Airport Link Tunnel in Perth, Australia and the Epping to Chatswood Rail Link in Sydney, Australia. This presentation will cover the different aspects of their requirements and the resulting NLT solutions.

Speaker Bios:

Bill Kalogerakis is NLT's Business Development Manager and focusses on marketing NLT's Digital and Cap Lamp products and solutions to customers in Canada. Prior to NLT Bill was with GE Mining as an Account Manager selling the GE Store to Mining Companies in Canada. Bill has a BSc in Analytical Chemistry and an MBA.
